# BOND

*A portfolio of wines from Napa, California, that is diverse in geographic representation and is Grand Cru in quality. Bill Harlan has created five "Grand Cru" vineyards to explore, representing the best of what the vines and terroir have to offer. They are listed from the most Northern and highest elevation to the more Southern vineyards.*

## QUELLA

*The name is derived from the German word for a pristine source or an artesian aquifer. This property is steeply sloped facing southwest. The site is an ancient riverbed composed of cobble and rocks interwoven with pockets of tufa (volcanic ash) that were uplifted during the last volcanic activity in the area. Quella displays an almost ethereal quality of blue fruits, graphite, and a vibrant, subtle finish.*

## ST. EDEN

*Eden is a historical reference to this region's designation on nineteenth century maps. The red rocky soil of this north facing site originates from high in the Vaca Mountains. It shows great focus, an opulent "sweet" center and notes of crème de cassis, dark chocolate, and roasted herbs. Mineral-tinged and broad on the palate, it finishes with fine-grained tannins.*

# BOND

---

## VECINA

*The name is coined from the Spanish word for neighbor. This is the endeavor with the property situated directly southeast of the Bond winery. The Vecina is always powerful, intense and savory. Vecina's other hallmarks are blackberry fruit, with wild forest floor and earthiness.*

## MELBURY

*The name pays homage to a historic area in London, where the estate owners reside much of the year. This wine consistently displays plush red fruits (currants, bing cherries), with spice and the scent of violets*

## PLURIBUS

*The name refers to the Latin word for many, chosen to signify the various facets involved in creating a fine wine: the sun, soil, and climate of a vineyard. Its character is bold, rich and concentrated; elements of dark plum, roasted coffee and scents of cedar are its hallmarks.*
